

INFORMATION TECHNOLOGY STANDARDS

## Adaptation of Software Engineering Standards for Very Small Enterprises

**Claude Y Laporte\* & Alain April**  
Department of Software and IT Engineering  
École de technologie supérieure - Québec

**Alain Renault**  
Centre de recherche public Henri Tudor – Luxembourg

**\*Editor – ISO/IEC JTC 1/SC 7- Working Group 24**

CENTRE DE RECHERCHE PUBLIC  
**HENRI TUDOR**  
www.tudor.lu

## Agenda

- Introduction
- Mandate of ISO SC 7.
- Steps toward creation of a new ISO SC 7 Working Group.
- Report of First Working Group (WG) 24 Meeting
- Next Steps.
- ISO survey for VSE

 Université du Québec  
École de technologie supérieure

SPICE 2006 - Luxembourg 2

CENTRE DE RECHERCHE PUBLIC

## Introduction

*“Adaptation of Software Engineering Standards by Very Small Enterprises”*

Target :

- VSE = less than 25 employees
- Scope includes also small project or department within a larger organization

Université du Québec  
**École de technologie supérieure**

SPICE 2006 - Luxembourg

3

CENTRE DE RECHERCHE PUBLIC

www.tudor.lu

## Very Small Enterprises (VSE)

➤ 85% of IT companies in Europe have 1-10 employees

Type	% of Enterprises	Number of companies	Number of Jobs
SME	99%		81 million
VSE	93%	19 million	

Source: NORMAPME (European Office of Crafts, Trades and Small and Medium-sized Enterprises for Standardisation).

Université du Québec  
**École de technologie supérieure**

SPICE 2006 - Luxembourg

4

**Very Small Enterprises (VSE)**

➤ Example – Greater Montréal Area.

Number of employees	Number of Enterprises	Percentage	Number of Jobs
1 to 25	540	78%	5105
25 to 100	127	18%	6221
Over 100	26	4%	6056

Source: Laporte 2005.

SPICE 2006 - Luxembourg

**VSEs and Standards : observations**

1. International standards were not written for and/or is hard to apply in small projects, small development organizations, or companies that have between 1 and 25 employees.
2. International Life Cycle Standard ISO/IEC 12207 and guide do not explicitly address the needs of VSEs.
3. Compliance with standards is difficult (if not impossible) for VSEs to achieve.
4. VSE's have no or very limited ways to be recognized as an enterprise that produces quality software systems in their domain.
  - VSEs are cut off from some economic activities.
5. Implementation of current standards requires a significant critical mass in terms of number of employees, cost and time.
6. VSEs cannot see a net benefit in establishing a software process as defined by current standards.

## IEEE User's Survey

### Implementation Difficulties

- Benefits of implementation not clearly understood
- Not enough useful examples
- Cost
- Lack of templates, implementation checklists.
- Compliance determination

## IEEE User's Survey

### Requested Support Items

- User training course
- Examples of deliverables
- Deliverable templates
- CASE tool support for documentation generation
- On-line or phone support
- Software Engineering Standards newsletter
- Software Engineering Standards users group
- Educators resource/support

## SC7 Meeting in Brisbane - 2004

---

- Canada raised the fact that small enterprises require standards adapted to their size and maturity,
- A meeting of interested parties was held with delegates from 5 national bodies (Australia, Canada, Czech Republic, South Africa, and Thailand),
- **Consensus:**
  - Make the current software engineering standards **more accessible to VSEs**;
  - Provide turn key material that require **minimal tailoring and adaptation effort**;
  - **Align, if desirable**, profiles with the notions of maturity levels presented in ISO/IEC 15504.

## First Special Working Group Meeting

### Thailand – March 2005

- Hosted by the Thailand Industrial Standard Institute (TISI) and the Thai Software Industry Promotion Agency (SIPA),
- **Representatives of 11 NB**
  - Australia, Belgium, Brazil, Canada, Czechoslovakia, Finland, South Africa, South Korea, USA and Thailand.
- **Outputs**
  - Project vision and strategy;
  - Draft New Work Item (ISO SC 7, Document N3288)
    - Project Schedule;
    - Product Plan;
  - Initial requirements document;

สำนักงานส่งเสริมอุตสาหกรรมซอฟต์แวร์แห่งชาติ (องค์การมหาชน)  
Software Industry Promotion Agency (Public Organization)

## Examples of Issues and Proposed Solutions

### by Thailand about ISO/IEC 12207

SMEs are <u>not ready</u> to implement the <u>whole</u> 12207 standard.	➡	Standard should be <u>broken down</u> in to <u>stages</u> or levels in order to <u>fit all sizes</u> of SMEs.
Not all 12207 activities are suitable for SMEs' operations.	➡	Need to <u>modify</u> activities to suit SMEs' operation – product and project based type of business.
There is no <u>assessment model</u> .	➡	A set of <u>checklist</u> was developed for use by assessors.
Most software developers are <u>not document-oriented</u> .	➡	Provide <u>packaged templates</u> and <u>examples</u> for rapid documenting

## Requirements for a new standard

- ▶ Help VSEs
  - ▶ Focus on lower levels of maturity
  - ▶ Produce documents easy to understand
  - ▶ Produce guidelines applicable to small teams or projects
  - ▶ Address VSE market needs
  - ▶ Provide examples
  - ▶ Develop scalable profiles and guides

Université du Québec  
**École de technologie supérieure**

SPICE 2006 - Luxembourg 15

CENTRE DE RECHERCHE PUBLIC  
**HENRI TUDOR**  
www.tudor.lu

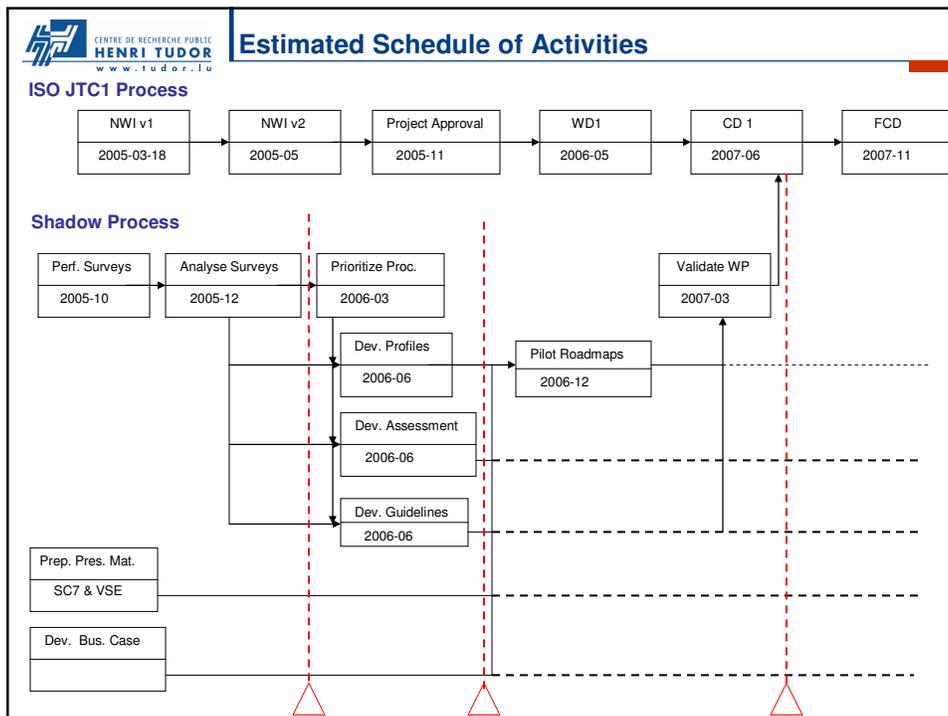

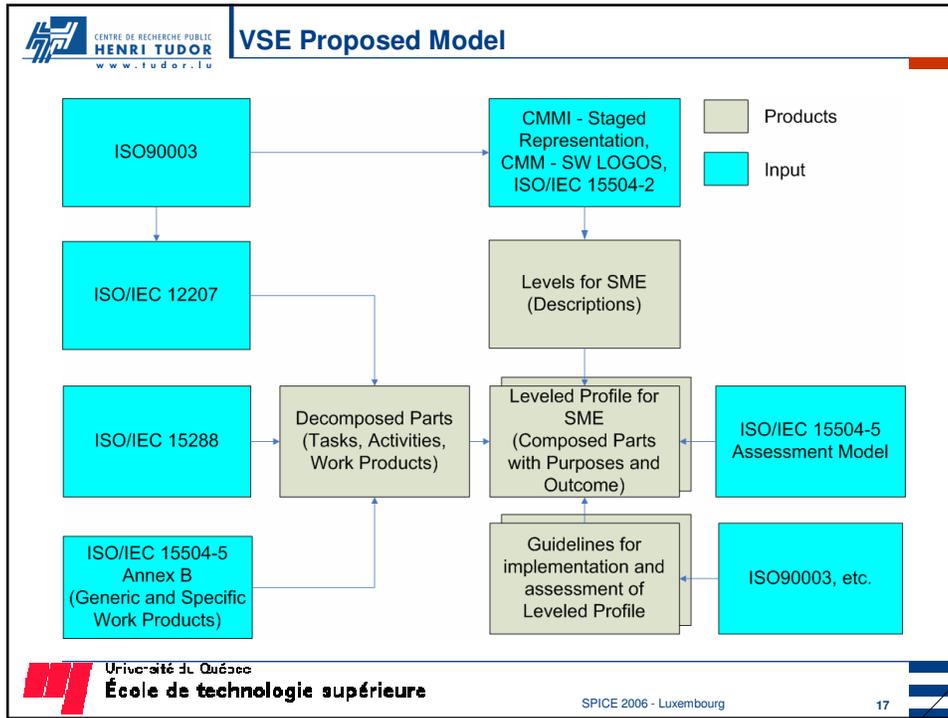

## Potential Benefits for VSEs

- ▶ The use of the documents should contribute to the reduction of risk
  - ▶ Business, cost, schedule and quality
- ▶ The use of the documents should facilitate alignment of the IT strategy to the business objectives.
- ▶ The documents should help understand and appreciate the value added (short and long term).
- ▶ The documents should offer guidance on quantifying the benefits of standards implementation.

## SC7 Meeting in Finland – May 2005

---

- Proposal developed in Thailand was reviewed
  - Recommendation: To establish a new Working Group
- Resolution was approved to ballot the New Work Item Proposal
  - *Software Life Cycle Profiles and Guidelines for use in Very Small Enterprises (VSE)*
- Working Group 24
  - Mr. Tanin Uthayanaka (Thailand) was appointed Convener.
  - Mr. Jean Bérubé (Canada) was appointed Secretary.
  - Mr. Claude Y. Laporte (IEEE CS) was appointed Project Editor

## Second Special Working Group Meeting Thailand – September 2005

---

- Hosted by the Thailand Industrial Standard Institute and the Thai Software Industry Promotion Agency
- **Representatives of 9 NB**
  - Australia, Belgium, Canada, Finland, Japan, Luxembourg, South Africa, USA and Thailand.
- **Outputs**
  - Proposition to use International Standardised Profiles (ISPs) as a framework to develop documents (e.g. guides)
  - Proposed business models to help classify VSEs
  - Proposed **survey on VSEs exposure and needs** for software development lifecycles;

## First SC7 Working Group 24 Meeting

### Italy – October 2005

---

- **12 Countries committed to participate to Working Group 24**
  - Belgium, Canada, Czech Republic, Ireland, Italy, Japan, Korea, Luxemburg, South Africa, Thailand, UK, USA.
  
- **Outputs**
  - New Work Item – comments received during balloting,
  - Project Requirements,
  - Business Models,
    - Custom on contract, Custom in-house, Commercial products, Mass-market software, Firmware.
  - Strategy to create profiles.
  - Users' Survey,
  - Strategic Plan,
  - Web site for public review of documents produced.
  
- **To be done**
  - Perform Users' Survey.

## Survey on the use of ISO/IEC Standards by VSEs

- <http://www.jtc1-sc7.org/>
  - Login : isosurvey
  - PW : vse
  
- March-May 2006
  - 278 companies
  - 23 countries
  
- Almost the end, **please distribute and contribute !**

Université du Québec  
**École de technologie supérieure**

SPICE 2006 - Luxembourg

23

CENTRE DE RECHERCHE PUBLIC  
**HENRI TUDOR**  
www.tudor.lu

## Survey on the use of ISO/IEC Standards by VSEs

- 65% of VSE are certified
- 60% of non certified VSE are not using any standard
  - Not required
  - Lack of resources
  - Too time-consuming
  - Standards are (considered):
    - Too difficult and bureaucratic
    - Not enough guidance is available
    - Incompatible with existing management system

Université du Québec  
**École de technologie supérieure**

SPICE 2006 - Luxembourg

24

CENTRE DE RECHERCHE PUBLIC  
**HENRI TUDOR**  
www.tudor.lu

## Survey on the use of ISO/IEC Standards by VSEs

- **VSE context is different**
- It is possible to make it KISS and work
- IT industry is demanding (in some countries) and ready to invest
  
- Please let's not forget VSE

Thank you to contribute to our survey : <http://www.jtc1-sc7.org/>
